

### Lobby Sign – Front View

Alternate design will have a removeable facade that will slide on from the front and be secured with discreet screws/hardware

An alternative to dropping the skin/sheathing over the top of the fins is to fabricate a "U" shaped piece that can slide on from the front. The caveat with this is it will leave a small seam on the top edge where the horizontal surface meets the vertical sides.

The skin/sheathing will all be made from 1/2" thick MDF, and painted according to requested specs: sprayed, BM OC-118
